

# Finding Sums

- Provide students, pairs, or small groups with a set of dominos.
- Have students find dominos that show a sum of a target number. For example, we can ask them to find dominos that have a sum of 7.
- Have students then record the domino and write an equation to show the sum.
- *Note: Recording sheet is on next page. Domino cards are included here and with other tasks in this book.*

Find dominos that have the same sum. Record the domino. Write an equation to show the sum.

# Directions

- Print the domino cards on copy paper or cardstock.
- Cut apart the cards on the dotted lines.
- The dark, full lines separate the pips on a domino card.
