

The IB programme allowed me to have the best high school experience possible. I was surrounded with like-minded and passionate students who worked together to motivate and help each other through the programme. I also met the extraordinary teachers who eagerly used their unique expertise to broaden our understanding of their respective subjects. The IB programme challenged us while allowing us to have some flexibility in choosing subjects from the six course groupings.

Participating in this programme helped me build a strong platform for my transition from high school to university. I learned to keep up with a demanding workload while also balancing my school, home, work, and social life. On top of that, the ability to transfer IB credits in high school worked in my favor by fulfilling many first year requirements. Not only was I able to save time and reduce my tuition fee, but I was also able to move onto higher level courses in my first semester.

Overall I would recommend the IB programme for students who are looking for a fun and challenging high school environment. It is an opportunity to participate in something that is beyond the ordinary high school experience. You will gain valuable skills while forming life-long friendships.

The Kelvin IB program was intense and tough but also fun and rewarding. It really prepared me for work in university. I highly recommend it to any student looking for that extra challenge. It was one of the best choices I ever made.

I had not initially planned on entering the IB program, and just wrote the exam on a whim. Prior to joining the IB program I had always went through school with minimal effort, and thought my natural intelligence would carry me through high school and university. I feel the most important part of IB for me was that it gave me a chance to fail, and understand my weaknesses at a young age without many consequences which forced me to greatly improve my study habits. Although I definitely struggled in the early parts of the IB program, the excellent teachers helped me develop my passion for learning and understand the work ethic that was required for a successful university career. I decided not to transfer many credits in first year, but I transferred a few credits in my last year which helped me finish my Bachelor's in an even 4 years.

It was a pleasure to work alongside so many dedicated students and educators in IB. It was a real community that fostered personal growth during my most formative years. I'm certain it smoothed my transition into post-secondary education.
