

## Challenge Activities!!!

1. Shapes: I can build shapes, numbers and letters using a variety of materials. What can you build? Look for the materials you can find at home (example: pasta, toy cars, crayons, etc.) to use for this activity.

2. Go for a walk (remember to observe social distancing) and have your child observe the changes in the surroundings. Take a look at this tree (picture below) and ask your child a question (ex. What do you notice?). I suggest you to take a picture of a particular tree everyday (or whenever possible) and have your child observe the changes.

3. We built a fort using chairs, a curtain and a blanket. What can you build?
