

Finding Equal

- Provide students, pairs, or small groups with a set of dominos.
- Have students find two dominoes that have the same sum or difference.
- Have students record both dominoes and write an equation that shows that they are equal. For example, a student might pull a 3 and 5 domino and a 4 and 4 domino. Their equation would be $3 + 5 = 4 + 4$.
- *Note: Recording sheet is on next page. Domino cards are included here and with other tasks in this book.*

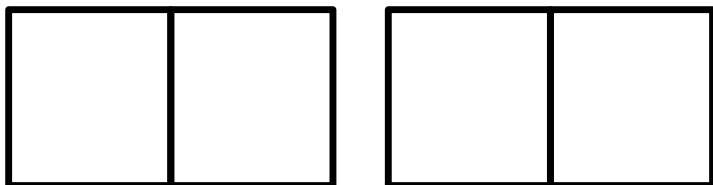

Find dominoes that have the same sum. Draw a picture of the dominoes and write an equation to show they are equal.

Directions

- Print the domino cards on copy paper or cardstock.
- Cut apart the cards on the dotted lines.
- The dark, full lines separate the pips on a domino card.
