

The IB program was an amazing high school experience. This program helps you become a well-rounded person; teaching you to look at the world from a broader perspective (TOK), teaching you about the importance of being involved in more than just academics (CAS), and letting you discover your own academic interests and focus on them. What makes this IB program stand out so much though, is the staff. The IB coordinator, Ms. Decelles, is what makes this program so phenomenal. She puts everything she has into the program to ensure each and every student feels successful on their own terms. Along with Ms. Decelles, all the IB teachers are so committed to the student's learning and these relationships are what got me through this program.

IB set me up to be successful in university by preparing me for self-study and allowing me to find my unique interests while still in high school. I am very thankful for the IB experience and would recommend it to anyone with the desire to engage in learning and push themselves in their academics.
