Let's get career-ready!

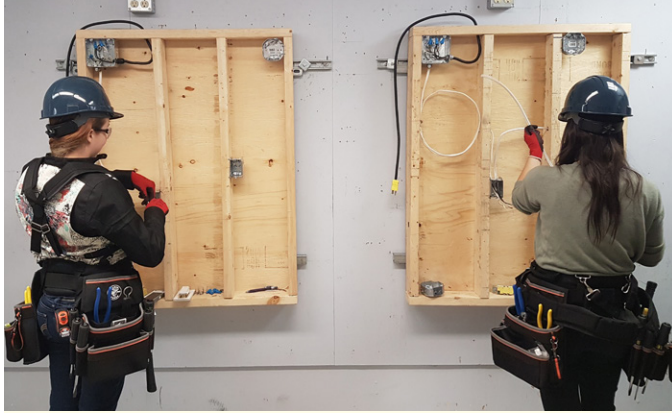

Individuals working in electrical trades technology play an important role in our economy and society.

These individuals plan, assemble, install, repair, test and maintain electrical fixtures and systems that provide heat, light, power or control in residential, commercial and industrial buildings.

They are able to understand and follow detailed blue prints and documents along with visualizing complex electrical systems. In addition, they are excellent problem solvers and take pride in their work.

To earn a head start on your career - apply now!

Winnipeg School Division is offering this program in partnership with the International Brotherhood of Electrical Workers (IBEW 2085). The program will be partly taught in the IBEW training facility located in the Manitoba Building Trades Institute on McPhillips street.

Electrical Trades Technology Winnipeg School Division

Co-operative Apprenticeship Program

The Electrical Trades Technology program aims to provide the skills, theory and experience needed to start an apprenticeship as a Construction Electrician.

If you like precision work and are interested in electrical wiring systems and controls, you should consider a career as a construction electrician. Electricians adhere to tightly regulated industry standards for the installation, repair and safety of electrical systems.

Electricians have a good background in mathematics and science. They understand and apply a range of technical knowledge.

The future is in your hands. Get a head start on your career now!

For more information, or to start the application process, please talk with the guidance counsellor at your school.

Apprenticeship

The program consists of two full-time semesters of course work. Starting in February, students will participate in both theory and lab instruction at the Manitoba Building Trades Institute on McPhillips street. Both semesters combine classroom theory instruction and practical lab training. Upon completion of the program students will have earned the following eight vocational credits:

- Introduction to Electrical Trades Technology 20S
- Electrical Trades DC Fundamentals 30S
- Residential Wiring 30S
- Electrical Wiring Methods 30S
- Advanced Residential Wiring 40S
- Electrical Trades AC Fundamentals 40S
- Advanced Electrical Wiring Methods 40S
- Applied Electrical Trades Technology 40S

Requirements to enter the Electrical Trades Technology program includes:

- Currently enrolled in grade 11 or 12 in a Winnipeg School Division school.
- Currently enrolled in Applied and/or Pre-Calculus Mathematics
- Strong desire to learn and work in the electrical trades
- Completion of an Apprenticeship application
- Participation in an interview

Students who have recently graduated from a Winnipeg School Division high school can submit an application. A registration fee may apply.
