## Math

Students will strengthen their mathematical knowledge through daily lessons and various hand-on activities. The main topics of focus this year is; numeracy, patterns, shapes and space, statistics and probably.

## English Language

## Arts

Literacy is a large building block in your child's education.

Thankfully, we have several literacy programs available to help your child reach their full potential. Students will receive daily literacy activities and lessons. In addition, students will have the opportunity to apply their knowledge through journal writing, and literacy-based activities.

## Technology

Students will use, Seesaw, Dreambox, and Class dojo throughout the year. They will also learn about internet safety

## Classroom Expectations

Students are expected to attend school regularly on time at our designated pick up and drop off area (playground). Please bring \$30 school supplies and 2 boxes of tissues to share with the class. Thank you!

## Science

In science we will be learning about a range of topics through the inquiry process. This includes the Growth and changes in plants and animals, Properties of solids and liquids, air, water and the environment, materials and structures, forces that attract and repel and finally soil and the environment.

## Social Studies

This year in Social Studies we will be learning all about the Communities of the World. We will be connecting with Canadians, exploring an ancient Societies and exploring the world,
