

Welcome to Room 226

Good Evening Parents and Guardians,

My name is Mrs. O. Lewis-Coutain. This is an exciting year for both the students and me. I am looking forward to working with the wonderful students in room 226. During the school year we will cover the following topics in the different subject area.

Language Arts: During the year we will focus on several aspects from the grade **3 and the grade 4 curriculum** such as: reading, writing, speaking, listening, grammar and spelling. Those are some of the things the students wrote as their goals for this year.

Science: (Grade 3) Students will study Growth and Changes in Plants, Materials and Structures and Soils in the Environment.

(Grade 4) Students will study Habitats and Communities, materials and structure, and Rocks, Minerals, and Erosion.

Math: Students will study the four strands in the math curriculum: Number Sense; Patterns and Relations; Statistics and Probability; and Shape and Space which includes: addition, subtraction, division, multiplication, fractions, measurement, solving word problems and mental math.

Social Studies: (Grade 3) Students will cover the grade 3 curriculum: connecting with Canadians, Communities of the World and Exploring an Ancient Society

(Grade 4) students will cover the grade 4 curriculum: Connecting with Canadians, exploring an ancient Society, Geography of Canada and History of Manitoba.

Health: We will study the benefits of physical activities, healthy eating, personal health practices such as proper hand washing, to prevent the spread the germs and diseases.

Art: Students will learn about principles of design through colours, shapes and lines. We will also be working with Ms. Bacchus on special projects.

Please feel free to call or stop by at anytime.

Thank you,
Mrs. Lewis-Coutain
