KELVIN CLIPPER

WINTER 2025 | NEWSLETTER

MESSAGE FROM ADMINISTRATION

As we approach the holiday season, I want to take a moment to extend my warmest wishes to all of our students, families, and staff. This time of year is a wonderful opportunity to reflect on the past months, to celebrate our achievements, and to cherish the moments spent with loved ones.

I hope that each of you enjoys a joyful holiday season filled with laughter, relaxation, and connection. Whether you are celebrating traditions, creating new memories, or simply enjoying the company of family and friends, may this season bring you happiness and peace.

As we look forward to the New Year, I encourage all our students to take full advantage of this break to rest, recharge, and rejuvenate. Returning to school after time spent with family and friends will allow our students to approach school with renewed energy, focus, and enthusiasm. A well-rested mind and body is essential for learning, creativity, and personal growth.

January marks the final stretch of Semester 1, with students completing final assignments and assessments and sharing their learning in a variety of ways. This is always an exciting time to recognize student effort, growth, and success.

Thank you for your continued support in making Kelvin High School a vibrant, caring, and inspiring community. On behalf of our staff, I wish you a very happy holiday season and a New Year filled with health, happiness, and success.

Warm regards,

Tim Cox

Principal
École Secondaire Kelvin High School

DECK THE HALLS

HOLIDAY BREAKFAST: A KELVIN TRADITION

On Friday, December 5th, we hosted our 26th annual toy drive and breakfast for the students of Faraday Elementary School. 270 excited students were welcomed with a breakfast of pancakes, sausages, banana bread, fruit and juice. The children then participated in a variety of fun and festive activities, which culminated with the arrival of Santa Claus who distributed brand new presents, stuffed animals and books to each child.

The response to our toy drive fundraising effort was wonderful. Each of our special guests received a new toy, books, along with a stuffie and stocking. We also managed to donate over two truckloads of used toys and stuffed animals to Value Village. Congratulations to Mr. Brown classes for winning some cookies by bringing in the most books, stuffed animals and money and to Mrs K. Stewart for collecting huge donations of books and toys from the Riverview community.

Thanks to staff and students who gave up their lunch hours, evenings and weekends to make the morning happen, and to all the students who helped during the morning. We would also like to recognize the contributions of our partners, sponsors, staff, parents and community members whose generosity, patience and kindness made this a magical and memorable morning.

A very special thanks to all our custodians, teachers and our administrators.

Thanks, and best wishes to a group of very special and remarkable team members: Mme Morsy, Mrs Stewart, Mme Bisson, Mr. Desrosiers and many more. Without their time, energy, and enthusiasm the day would never have happened. Together, we did make a difference, and although the morning has come and gone, the spirit of good will continues to live on in our hearts!

WHAT DO YOU GET WHEN YOU MIX POLAR BEARS WITH HIGH SCHOOL STUDENTS?

In the case of the Northern Student-led Arctic Research Program (NorthSTAR), you get non-invasive field research yielding important climate change indicators conducted from the safety of tundra vehicles. The body condition of polar bears may be an important indicator of changing climate, as the critical hunting days when the sea ice is frozen have declined with rising temperatures.

The students of the Northern Student-led Arctic Research program have once again had the chance-of-a-life-time as they travelled up to Churchill to study polar bears together. Just after arriving, the weather turned cold with 80 km winds from the north. This was great news as the bears became quite active and we had the thrilling experience of watching male bears sparring. We also saw a number of female bears with very cute cubs.

The days were filled with socializing and collaborating with groups from Norway House, Churchill Junior Canadian Rangers, University of Manitoba Wawatay Scholars and Winnipeg students from Nelson MacIntyre and Kelvin High School. A highlight was having a bonfire and hanging out at the cabin of one of the Churchill leaders as well as exploring the town with the Churchill students.

The next steps involve analyzing the data taken from the tundra buggies and continuing to monitor the body condition of the bears that we have studied over the last 15 years.

Check out the website for more details: <https://www.northstarscience.ca/>

STUDENTS IN THE COMMUNITY

Ashley Chan, a Grade 11 IB student at Kelvin High School, has been volunteering with the Prairie Wildlife Rehabilitation Centre as a Wildlife Educator since last summer. In this role, she works closely with animal ambassadors—wild animals that cannot be returned to the wild—and helps deliver educational presentations at schools, community events, and senior homes, including Kelvin's Homecoming. Ashley volunteers weekly, caring for a wide range of animals and helping raise awareness about Manitoba wildlife. PWRC relies on volunteers like Ashley, along with donations and grants, to continue providing specialized care to injured and orphaned animals across the province. Reminder, students can receive a high school credit for volunteering!

KELVIN SCIENTISTS WINNIPEG FREE PRESS EDITION

Kelvin have been collaborating with the Winnipeg Free Press newspaper in their Media Literacy and Learning pilot project called "The Student Press". The students produce and publish "The Kelvin Scientist" giving authentic student voice to projects and programs that they are involved with. Check out the first editions: <https://www.winnipegfreepress.com/flipbook-category/ecole-secondaire-kelvin-high-school>

ESPORTS TOURNAMENT HIGHLIGHTS PROVINCIAL PARTICIPATION

On November 29, our school hosted a successful provincial Esports tournament, welcoming 250 Middle Years and Senior Years students from across Manitoba, including teams travelling from as far as Birtle. The event was widely praised by students, coaches, and families for its strong organization and positive atmosphere. Our Rocket League team competed in close matches and enjoyed the experience, while our Smash Ultimate players had several strong performances. Most importantly, students had fun, built connections, and demonstrated excellent sportsmanship.

Thank you to the Esports organizing team, student volunteers, Student Council, staff who shared their spaces and resources, custodial staff, and school and divisional administration for making this event possible. Your collective support helped ensure a smooth and memorable experience for everyone involved.

WHAT A BRIGHT IDEA!

New projects from electronics! Lithophanes led displays, LED neon signs, arduino based LED signs made with CNC machine, laser engraver and 3D printer.

FALL COFFEEHOUSE: A SHOWCASE OF STUDENT TALENT

The Fall Coffeehouse of 2026 showcased a variety of amazing student talent. We had both solo and duo acts with contemporary and classical repertoire. The supportive audience fueled the performances!

BEYOND THE TEXTBOOK: A WAR STORY

On November 19th, John Graham joined the IB Grade 12 World History class to talk to the students about his father's time serving in the Second World War. John told his father's story by reading the letters his dad sent home to his mom while he was overseas. The letters were really interesting as they provided a glimpse into the life of a Second World War soldier and how the conflict affected him personally. Many of the letters were sent from Singapore, where his dad worked in radar. In 1941, John's father was captured by the Japanese and he became a prisoner of war in Sumatra until the end of the war. Several letters seemed to omit many hardships he endured in the camps, as after the war, he weighed only 90 pounds. Having the opportunity to hear of the experiences of not only a soldier, but also a POW is something that we can never learn through a textbook. - Emrik, Kelvin Student

KELVIN REMEMBERS

Every November, Kelvin High School pauses to honour and remember those who have served and sacrificed during times of war, conflict, and peace. Focused on commemoration through the lens of our school's history, the Kelvin History Club offered an interactive and relevant educational experience for our students. In front of the war memorial by the main office, they set up the Hall of Honour, which displayed all of the Kelvin soldiers who served and died in the First and Second World Wars. The Hall of Honour allowed students to understand on a deeper level the impact and history of war and its close connections with Kelvin. Alongside the Hall of Honour, the Kelvin History Club also set-up a display table that showcased various historical artifacts ranging from paintings, to books, to letters, and even primary sources from the First World War. During their visits, classes were guided through the commemoration with mini-tours led by the Kelvin History Club members. - Kristina, Student

NEIL YOUNG, A KELVIN ALUMNI!

On November 12th, the Kelvin History Club invited all of Kelvin to celebrate Neil Young's 80th birthday. Our club was initially inspired by the painting of Neil Young that hangs in our stairwell, and once we realized that his 80th was fast approaching, we used the opportunity to feature him as our next project.

Our group spent weeks brainstorming the perfect birthday celebration. We wanted to strike a balance between honouring the original artwork and creating something eye-catching and exciting. Ultimately, we decided to curate a display for Neil Young's 80th birthday and paint a mural of his name above the painting in the stairwell.

One Saturday afternoon, our club met at the school and got to work on the display and mural. Victoria Shevchenko did an incredible job creating the final design for the mural and bringing our plans to life by painting it. Also, thanks to Jack Harper (a friend of Neil's) who lent us cool Neil Young artifacts and photos, and a few hours of making photocopies at Staples, our display case was full of all things Neil Young, a first-of-its-kind display for the Kelvin History Club.

On the morning of his birthday, we played his music through the halls of Kelvin and made an announcement about his accomplishments and time at our school in the early 60s. During the lunch hour that day, we set up a table outside our display to showcase some of our more valuable artifacts and even had live performances by Kelvin teachers. It was a great way to interact with fellow students and get others interested in our school's history and its famous alumni.

To top it all off, Kelvin High School issued Neil Young an honorary diploma, which was gifted to him on his birthday. Overall, our 80th birthday celebration for Neil Young couldn't have gone better. Hopefully, it will become a fun tradition for years to come. - Amare, Student

SPOOK-TACULAR HALLOWEEN

We all had a spook-tacular time celebrating Halloween this year! Some of the super fun games the Grade 9s played were Apple Bobbing, Blindfolded Musical Chairs, and a Halloween Relay Race. The Grade 12 mentors also put together a super scary haunted hallway for everyone to go through, and the principals seemed pretty spooked. Everyone had lots of fun... and lots of candy! Thanks to the amazing mentor Halloween team for organizing and running this wicked event!

Nous avons tous passé un moment sorcièrement fantastique en célébrant Halloween cette année! Quelques jeux super amusants étaient la pêche aux pommes, les chaises musicales à l'aveugle et une course-relais d'Halloween. Les mentors de 12e année avaient aussi préparé un couloir hanté effroyablement bien fait pour que tout le monde puisse y passer, et les directeurs avaient l'air terrifiés! Tout le monde s'est éclaté... et a mangé plein de bonbons! Un grand merci à l'incroyable équipe d'Halloween des mentors pour avoir organisé et animé cet événement ensorcelant! Briony, Grade 12 Mentor

TAKE YOUR KID TO WORK DAY SUCCESS

From left: Alex Neve (Massey Lecturer and author of *Universal: Renewing Human Rights in a Fractured World*), Maddie Willis, and Hugo Beauvilain at the University of Winnipeg (Photo credit: Shauna Labman)

This year's Take Our Kids to Work Day was a tremendous success, with more than 200 Grade 9 students exploring a wide range of workplaces alongside a family member or family friend. From helping out in classrooms, to gaining insight into the world of retail, to observing a newborn assessment in a labour and delivery ward, students enjoyed an authentic "day in the life" of countless occupations—thanks to the generosity and support of our community.

Students Hugo Beauvilain and Maddie Willis spent their day at The University of Winnipeg, where they attended a lecture titled "Cuddling Bats, Water Loss and White-Nose Syndrome," visited the university's Bat Lab, and toured the science facilities at the Richardson College for the Environment and Science Complex. Their experience continued in the afternoon with "A Discussion of Peacebuilding, Human Rights & Universality," featuring human rights advocate and researcher Dr. Kirsten Van Houten and Alex Neve, former Secretary General of Amnesty International Canada, Massey Lecturer, and author of *Universal: Renewing Human Rights in a Fractured World*. The event was hosted by U of W's Global College.

A CONVERSATION WITH MINISTER FRANÇOIS-PHILIPPE CHAMPAGNE

On November 21, Kelvin students were able to attend the Winnipeg Chamber of Commerce's "A Conversation with Minister François-Philippe Champagne". Students had the opportunity to meet several political leaders, including Premier Wab Kinew, MP Ben Carr, Minister Jamie Moses, and the Minister of Finance.

Minister Champagne spoke directly to the group about the economy and what it means to be Canadian, expressing his enthusiasm for their participation. The group also connected with MPs Rebecca Chartrand and Ben Carr, as well as Kelvin alumna Gail Asper, who shared memories of her time at the school and her lifelong connection to the arts.

À TOUTE VITESSE! LES CHIMISTES EN HERBE EXPLORENT LA CINÉTIQUE

Dans le cadre de l'unité de Cinétique dans la classe de chimie 12e avec Mme Finlay, les élèves ont mené des activités d'enquête expérimentale visant à explorer l'effet de différents facteurs sur la vitesse des réactions chimiques. Les élèves ont été répartis en petits groupes, chacun étant responsable de rechercher, concevoir et réaliser leurs propres expériences afin de déterminer l'impact du facteur choisi. Ils ont, par la suite, partagé leurs processus et découvertes avec les camarades de classe. Cette activité a permis aux élèves non seulement de manipuler et d'observer les réactions choisies en laboratoire, mais aussi de développer leur esprit critique, leurs compétences en analyse de données, et leur capacité à tirer des conclusions scientifiques. L'approche expérimentale a renforcé leur compréhension des facteurs influençant la cinétique chimique et les a aidés à faire le lien entre théorie et pratique. La curiosité, la créativité, et l'ingéniosité étaient mises en évidence tout au long de cette activité enrichissante!

LA PRODUCTION DES ESTERS
L'effet d'un catalyseur dans la production des odeurs artificielles

"J'ai eu un sens de liberté et un aperçu dans le monde de science au niveau postsecondaire. La méthode d'étudier différente a fonctionné mieux pour moi" -Will

"J'ai pensé que c'était tellement super. J'ai aimé faire cette expérience, j'ai appris comment la théorie des collisions affecte la vitesse de réaction." - Andrei & Zinnia

La décomposition de peroxyde

La température affecte la Vrxn

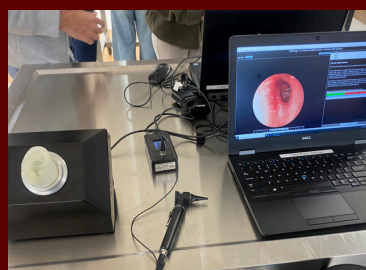

L'oxydation du luminol

"J'aimais beaucoup cette occasion d'avoir choisi ma propre expérience et de le faire en groupe! Il a augmenté ma compréhension globale des sujets qu'on est en train d'étudier au présent. C'était intéressant aussi de voir les expériences des autres groupes et leurs idées." - Emerald

U OF M HEALTH SCIENCES WORKSHOPS

The University of Manitoba Discovery Day in Health Sciences provides high school students with an opportunity to experience cutting-edge research and an opportunity to explore the numerous career paths in the health sciences. Students can learn about family practice, cardiology, neurology, dentistry, physiotherapy with hands-on workshop and lectures.

The science day at the U of M helped my understanding of how post-secondary education works and helped me think differently in terms of the "daunting"-ness of going to a new school. I also had lots of fun in the workshops in which I was able to use the university's lab equipment to conduct an experiment and attend a lecture on math. The lecture was very informative, talking about the ways in which the level of math is (calculus) and how it differs from our curriculum as of right now (pre-calculus). The professor also talked about her journey in education and how math had helped her find her path. This sparked an old, forgotten love for math, and made me want to try harder in the subject. Towards the end, I got to experience a mock lecture on calculus, which was very helpful in terms of getting to know what to expect! At the very end (after eating our lunch in a lecture hall, which doesn't usually allow the entry of food), we got to the information stands for different types of sciences, even the student committee and some clubs. All of them had at least some part of their booths being interactive, which made for a better and more interesting experience. All in all, the day was a day filled with fun and the air was filled with an excitement to learn." - M. Egawa, Grade 11

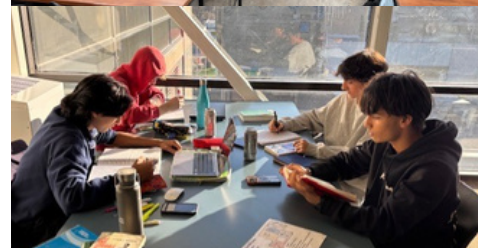

INTERNATIONAL BACCALAUREATE

IB students are reeling from coursework but also from all the great activities and events in the IB programme. Here are some highlights from the past two months:

- In November, the IB History classes visited the University of Winnipeg, where the students toured the library in preparation for their upcoming research paper. With the help of their teacher, Mr.C.Young, students were able to successfully navigate the library's book stacks. Additionally, as part of the visit, the classes attended a presentation by Michael Dudley, a University of Winnipeg librarian who demonstrated how to access numerous academic online resources available to them through the university but also through Kelvin. This visit familiarized the students with the process and expectations of university-level work and also provided a valuable break from the classroom. - Evan, Kelvin Student
- All Grade 11 and 12 IB students enrolled in at least one science course participated in the Group 4 Project, a whole-programme, interdisciplinary initiative led by the IB science team (*thank you Ms. Davidson, Ms. Labun, Mr. Mariano, and Ms. Temesvari!*). This year's theme, The Science of Cinema, had students exploring the real science behind movie magic — ever wondered if that dramatic leap from a plane was actually possible? Ask an IB student!
- Grade 12 IB English students continued a beloved Kelvin tradition by attending Shakespeare in the Snow, now more than 40 years strong. For three days in the Whiteshell, students immersed themselves in Hamlet, blending literary analysis with outdoor learning. Thank you to Ms. Devso, Ms. Hanson, and Ms. Wall

WHAT'S HAPPENING NOW:

- **First Annual IB Potluck:** On the evening of Friday, Dec. 12, Grade 12 IB students and teachers braved the cold to celebrate what we hope is the beginning of a new Kelvin IB tradition — the Grade 12 IB Cultural Holiday Celebration Potluck! Mme Morsy masterminded the event, recruiting an energetic team of Grade 12 IB students who worked hard to bring it all together. From beautiful decorations and thoughtful photo spots to meaningful table settings and food ingredient cards featuring each country's flag, the evening was a true success. Thank you to Mme Morsy, the planning team, and everyone who attended; you looked great, the food was delicious, and your Kelvin IB spirit made the night a triumph.
- **IB 2025 Graduation Ceremony:** Every December, on the final Wednesday evening before the holidays, graduating IB students are invited back to celebrate their accomplishments — and honestly, it might be worth joining IB just for the cake.

KELVIN INTERNATIONAL STUDENTS VISIT CHURCHILL

A group of international students from Kelvin High School recently embarked on an unforgettable five-day adventure to Churchill, Manitoba, known as the Polar Bear Capital of the World.

This incredible trip provided a unique opportunity to experience the stunning landscapes and wildlife of northern Manitoba, fostering friendships and cultural exchange. From spotting polar bears to exploring the icy beauty of the region, the stories and memories created during this journey will surely make being an international student in Canada an awesome experience!

GRADUATION NOTICES

All Grade 12 students should join the **Grad Google Classroom with the code bx5bsnet**. This platform covers all graduation-related topics, including scholarships, grad photos, safe grad, and ceremony details.

GRADUATION REHEARSAL

Friday June 19th, 2026
9:00 am
Mandatory attendance for all graduates
Assembly runs for approximately 1 hour
Kelvin Gym

SAFE GRAD

Monday June 22nd, 2026
Doors @ 5:30 pm
Cocktails @ 6:00 - 7:00
Dinner @ 7:15
Canad Inns Polo Park

GRADUATION CEREMONY

Thursday June 25th, 2026
Ceremony starts @ 4:00 pm
Grads should arrive by 3:00 pm
Smudging @ 3:15 pm
Duckworth Centre,
400 Spence Street

BOOK NOW! 2026 STUDENT GRADUATION PHOTOS

2026 Graduation Photos are taking place in the Library of Kelvin High School from January 12th to 16th and January 19th – 21st.

You will be prompted to:

- Enter the school's postal code: R3M 0G3
- School Name: Kelvin High School
- Then the students First and Last Name

Session Fee: There is a session fee attached to the sitting. Prepay online for a \$40.00 session fee or pay at the time of your photo session (*debit/credit preferred, cash or cheque made payable to Lifetouch Canada are also accepted*)

SAFE GRAD PARENT MEETING

On **Monday January 19th, 2026**, parents/guardians are invited to attend a Safe Grad information evening in the Kelvin High School theatre at 7:00 pm.

Safe Grad is a fun event sanctioned by Manitoba School Boards Association, MPI, Manitoba Liquor and Gaming, Winnipeg Police Service and RCMP. Safe Grad has a long history of providing graduates with a safe system to celebrate this important milestone.

The success of every Safe Grad is dependent on many parent volunteers. Two chairs are required before proceeding with this parent-run event and a prompt response is appreciated. If interested in co-chairing, please contact kelvin@wsd1.org.

If you would like to volunteer and cannot attend this general information session, please send us an email (kelvin@wsd1.org) and you will be contacted when Safe Grad planning begins.

CLIPPER SPORTS

A STANDOUT SEASON FOR KELVIN!

After winning their division against Sisler High School, Kelvin Varsity Girls Volleyball team made it to the top 8 in the Province, losing a tough home game for Vincent Massey Brandon. Annalis McKay Nodarse & Sara Buccini are being honored as Grad All Stars on the Volleyball Manitoba team this year. Monika Wegrzyn was featured in the Winnipeg Free Press as an athlete to watch out for in the future. Kelvin Gr 9 Girls also won their division against Sisler High School for the first time since 2016!

Congratulations goes out to the Gr 9 Girls Volleyball team who placed 4th out of 20 teams this at Provincials this year! What a massive accomplishment as they competed against the top in the Province and came out on top!

Congratulations to the Kelvin Water Polo Teams who finished a successful season at provincials this year. After exciting, hard fought weekend games, the girls won bronze and the boys won silver, and demonstrated strength, determination and skill. Way to go!

Congratulations to the Varsity Boys volleyball team on winning the Tec Voc tournament, defeating the Maples Marauders (2-0) in the finals. Special congratulations to Marty Frank for being recognized as a tournament all-star and to Caleb Unger for winning tournament MVP.
