SECTION A. STUDENT DEMOGRAPHICS – 2021/2022

BACKGROUND

The results presented in this section are obtained from the Division's Student Administration System records. Each student's record is examined and, if there is sufficient information, a determination of the student's family status is made. Languages spoken at home and the disaggregation data are taken directly from the records.

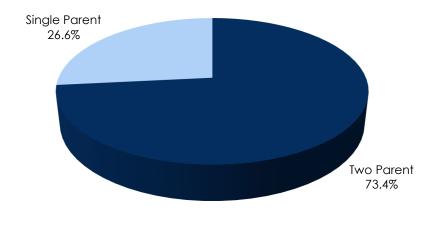

Students' families are coded as single parent, two parents and other. A student is considered to be living in a single parent family if living with any one of mother, stepmother, father, stepfather, grandmother, or grandfather; and living in a two parent family if living with any two of mother, stepmother, father, stepfather, grandmother, or grandfather. The 'other' category includes students living in group homes, in agency care, living on their own or with friends, or living with family members other than those considered to be parents.

Results are reported separately for elementary grades (N-6), junior high grades (7-8 or 7-9) and senior high grades (9-12).

DATA HIGHLIGHTS

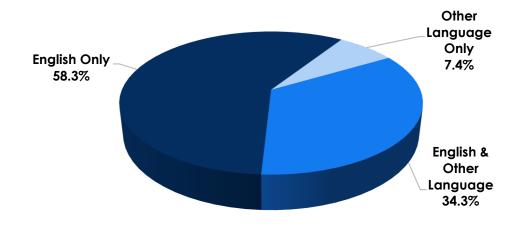

PARENT STATUS

- □ In 2021/2022, 94.7% (27,259) of Division students lived with parents or guardians. Of those living with parents, 26.6% lived in single parent families (**Figure 1**, and **Tables 1 and 2**, pages 9 to 11).
- In six elementary and nine secondary schools, the percent of students living in single parent families was equal or greater than 50%. The percent of single parent families in elementary schools ranged from 1.3% for Waterford Springs Elementary to 68.0% for Niji Mahkwa Elementary. The percent of single parent families in secondary schools ranged from 3.3% for Waterford Springs Gr. 7-8 to 78.0% for Niji Mahkwa 7-8.

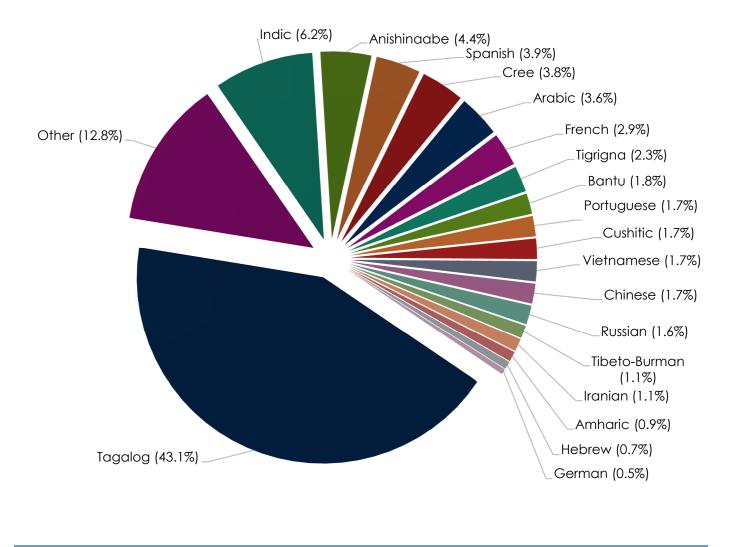

LANGUAGES SPOKEN AT HOME

- No English was spoken in the homes of 2,016 students (7.4%). This is labelled "Other Language Only" in Tables 1, 2 and 5 (pages 9-11, and 15-16), and Figure 2 below.
- The elementary schools with the highest percentages of students in homes where no English was spoken were Rockwood (26.4%), Victoria-Albert (25.7%), Brock Corydon (20.8%) and Dufferin (19.6%). For secondary schools, Hugh John Macdonald (23.1%), Daniel McIntyre (22.5%), Grant Park 9-12 (17.2%), and Gordon Bell 9-12 (17.2%) had the highest percentage of students coming from homes where no English was spoken.
- □ English and another language were spoken in the homes of 9,359 students (34.3%).
- Fifty percent or more of the students from six elementary schools (Waterford Springs Elementary, Lansdowne Elementary, Sacré-Coeur Elementary, Garden Grove, Tyndall Park, and Clifton) and eight secondary schools (Lansdowne 7-8, Waterford Springs 7-8, Sisler, Stanley Knowles 7-8, Andrew Mynarski, Sargent Park 7-9, Meadows West 7-8, and George V 7-8) were in homes where English and another language were spoken.

- The two language categories, "Other Language Only" and "English & Other Language" are combined into a category called "Not English Only". In total, 41.7% of students living with parents (with language data) came from such homes.
- Figure 3 (page 7) provides percentages based on the 11,375 students living with parents in "Not English Only" homes. The **five most frequently reported languages**, other than English, spoken in these students' homes were Tagalog (4,904), Indic (982), Anishinaabe (501), Spanish (441), and Cree (428).
- □ Languages spoken in Divisional homes are summarized in Table 5 (pages 15 to 16).

IMMIGRANTS/REFUGEES

- □ In 2021/2022, 17.2% (4,682) of Division students living with their parents were immigrants or refugees (Tables 1 and 2, pages 9 to 11).
- The elementary schools with the highest percentage of immigrant and/or refugee students were Victoria Albert (38.2%), Waterford Springs Elementary (38.0%), Dufferin (30.9%), Fort Rouge (29.0%), Harrow (22.6%), and Brock Corydon (21.9%). For secondary schools, Daniel McIntyre (54.9%), Andrew Mynarski (38.9%), Hugh John Macdonald (36.4%), and Sisler (34.1%) had the highest percentage of immigrant and/or refugee students.

DISAGGREGATION DATA

As per Provincial requirement, the Winnipeg School Division disaggregates student outcome data using four key variables: Gender, English as an Additional Language (EAL), Indigenous Identity, and Students in Care.

- □ Males represented 51.5% (14,841) of the Division's student population whereas Females represented 48.5% (13,961) (Table 3 and 4, pages 12 to 14).
- In 2021/2022, 17.7% (4,541) of Division students were identified as EAL (English as an Additional Language). As per Provincial guidelines, EAL students are not identified until the spring of their kindergarten year, therefore Nursery and Kindergarten students are excluded from this calculation.
- In fourteen elementary and nine secondary schools, the percent of self-declared Indigenous students was equal or greater than 50%. The percent of self-declared Indigenous students in elementary schools ranged from 4.2% for Brock Corydon to 89.6% for Niji Mahkwa Elementary. The percent of self-declared Indigenous students in secondary schools ranged from 5.1% for Waterford Springs 7-8 to 95.0% for Children of the Earth.
- Students in care, defined as any student under the care of Child and Family Services (CFS), accounted for 4.7% of the Division's student population (Table 3 and 4, pages 12 to 14). These students will have a completed 'School Registration Form' in their student file and would be identified by the 'Mandated Agency' flag in the Relationship field under the Contact tab of the Division's student records.
- □ The elementary schools with the highest percentages of students in the care of CFS were William Whyte Elementary (15.3%), Champlain (14.1%), David Livingstone Elementary (13.5%), Niji Mahkwa Elementary (13.0%), Prairie Rose (12.2%), Machray (11.8%), John M. King (11.7%), and Strathcona (11.2%). For secondary schools, David Livingstone 7-8 (20.9%), Niji Mahkwa 7-8 (18.6%), William Whyte 7-8 (17.5%), Children of the Earth (16.8%), and St. John's 9-12 (14.3%) had the highest percentage of students in the care of CFS.

(Notes on next page)

Note: <u>Tagalog</u> includes Tagalog, Pilipino, Ilonggo, Cebuano, Hiligaynon, Filipino, Bicol, and Kapampangan; <u>Anishinaabe</u> includes Anishinaabe, Ojibway, Ojibway/Saulteux, and Saulteux; <u>Cree</u> includes Cree, Ininiw, and Oji-Cree; <u>Indic</u> includes Bangla, Bengali, Gujarati, Hindi, Nepali, Panjabi, Punjabi, Sinhalese, and Urdu; <u>Chinese</u> includes Chinese, Cantonese and Mandarin; <u>Cushitic</u> includes Bilen, Borana, Oromo, and Somali; <u>Arabic</u> includes Arabic, Lebanese, and Maltese; <u>Iranian</u> includes Dari, Farsi, Kurdish, Pashto, Yazidi, Kurmanji and Persian; <u>Tibeto-Burman</u> includes Dha-Nywa, Chin, Karen and Burmese; <u>Bantu</u> includes Kisi, Swahili, Kirundi, Congolese, Lugandan, Nigerian, Kinyarwanda, Xhosa, Zulu, Nyanja, Chewa, and Sesotho.

Results based only on those students living with parents.

NOTES ON TABLES 1 TO 5

- 1. Adolescent Parent Centre and Winnipeg Adult Education Centre are excluded from analysis.
- 2. Adults (greater than 21 years old) are excluded from analysis.
- 3. Percentages for the columns under the heading "INFORMATION ABOUT STUDENTS LIVING WITH PARENTS" are based only on those students who were living with parents.
- 4. Enrolment is the official September 30th enrolment.
- 5. % Students surveyed are those students with sufficient data to determine family status.
- 6. % Single parent are those students living in a single parent household.

7. Results are presented in Tables 1, 2, and 3 by grade groupings: 1) <u>elementary</u> [N-6]; 2) <u>secondary</u> which includes <u>junior high</u> [7-9 in junior high schools, grades 7-8 in combined junior/senior high schools, and grades 7-8 in elementary schools that have these grades]; and <u>senior high</u> [9-12, including SU if present].

SECTION B. STUDENT MOBILITY AND STABILITY - 2021/2022

INTRODUCTION

This report summarizes the data on student mobility and stability for the 2021/2022 school year. Mobility and stability are calculated using the data from the eight-month period from October 1 to May 31. The data is based on student transactions on the Division's Student Administration System. Note: The COVID-19 pandemic impacted mobility and stability rates at many schools in 2020/2021.

DEFINITIONS

Mobility is the number of the total transfers divided by the average monthly enrolment^{*}, multiplied by one hundred. Total transfers include transfers in and transfers out.

Mobility = <u>Total Transfers</u> x 100 Average Enrolment

Stability is the number of stable students divided by the average monthly enrolment, multiplied by one hundred. Stable students are those who were enrolled by October 1 and had not transferred out before May 31 (or had not transferred at all).

Stability = <u># Stable Students</u> x 100 Average Enrolment

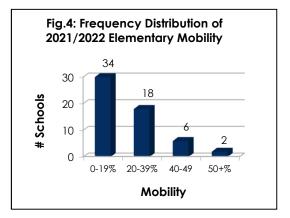

The stability rate is easier to interpret than the mobility rate. A stability rate of 85% means that 85% of the students have stayed at the school from October to May. A mobility rate has no tangible meaning by itself; but provides a relative measure of the incidence of student transfers for a school (both transfers in and transfers out) in comparison to other schools in the Division.

^{*} In this report the average monthly enrolment is based on the average of the month end enrolment.

MOBILITY DATA

ELEMENTARY MOBILITY (NURSERY TO GRADE 6)

- The mobility rate in 2021/2022 for all elementary grades was 20.0%, which is down 7.4% from the previous year.
- The figure to the right shows the frequency distribution of elementary mobility.
- In 2021/2022, eight schools, Norquay, Machray, Pinkham, William Whyte, King Edward, John M. King, Niji Mahkwa, and Weston had a mobility rate of over 40%.

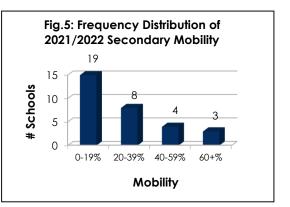

- The individual elementary school mobility results are found in Tables 6 to 9 (pages 21 to 24). In 2021/2022, mobility at individual elementary schools ranged from 1.7% (Robert H. Smith) to 65.9% (Norquay).
- Schools with the greatest decrease in mobility since the previous year were Carpathia (25.0%), Strathcona (23.0%), and Wellington (17.8%).
- Schools with the greatest increase in mobility for the same period were Norquay (17.7%), Machray (8.4%), and Weston (7.0%).
- Total transfers (Table 8, page 23) ranged from 6 (Queenston and Robert H. Smith) to 147 (Machray).

SECONDARY MOBILITY (GRADES 7 AND UP)

- The Division mobility rate in 2021/2022 for all secondary grades was 17.2%, down 5.0% since the previous year.
- The distribution of secondary mobility rates in 2021/2022 is illustrated in Figure 5.
- Five schools had mobility of 50% or greater: Virtual Secondary, Children of the Earth, Argyle, David Livingstone 7-8, and William Whyte 7-8.

- Tables 10 to 13 (pages 25 to 28) list mobility rates and total transfers in 2021/2022 for individual secondary schools. Mobility rates ranged from 0% (George V 7-8 and Ralph Brown 7-8) to 86.9% (Virtual Secondary).
- Schools with the greatest decrease in mobility from the previous year were Ralph Brown 7-8 (19.5%), St. John's (9.3%), and George V 7-8 (7.6%).

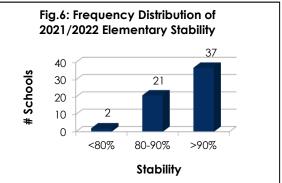

- Schools with the greatest increase in mobility from the previous year were Argyle (17.1%), Niji Mahkwa (10.9%), and David Livingstone 7-8 (7.8%).
- Total transfers (**Table 12, page 27**) ranged from 0 (Ralph Brown 7-8 and George V 7-8) to 302 (St. John's).

STABILITY DATA

ELEMENTARY STABILITY (NURSERY TO GRADE 6)

- The distribution of Elementary Stability rates in 2021/2022 is illustrated in the figure to the right.
- Thirty-seven of the sixty elementary schools had a stability rate of over 90%.
- Two schools had a stability rate less than 80% in 2021/2022: Machray (73.0%) and Norquay (75.0%).
- Over the last 3 years, the division elementary school stability rates have decreased from 93.6% to 91.7% (Table 6, page 21).
- The schools that showed the greatest decrease in stability this year were Norquay (6.1%), King Edward (4.9%), Gladstone (4.7%), Weston (4.4%), and Ralph Brown (4.1%).

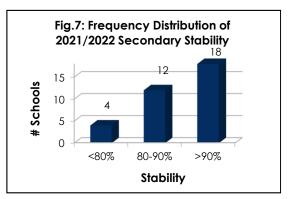

• Schools that showed the greatest increase in stability were Strathcona (12.2%), Glenelm (9.5%), Fort Rouge (6.0%), Lansdowne (5.1%), and William Whyte (5.0%).

• Table 9 (**page 24**) lists the 2021/2022 Elementary stability figures in order of decreasing stability. Stability rates ranged from 73.0% (Machray) to 99.3% (Robert H. Smith).

SECONDARY STABILITY (GRADES 7 AND UP)

- The figure to the right summarizes the stability rates for secondary schools in 2021/2022.
- Eighteen secondary schools had a stability rate greater than 90%.
- Four secondary schools had stability rates less than 80%: Virtual Secondary, Children of the Earth, Argyle, and Niji Mahkwa.

- Table 10 (page 25) shows the stability rates for secondary schools over the last 3 years.
- Meadows West (4.7%) and Ralph Brown 7-8 (2.4%) had the greatest increase in stability from the previous year, while Argyle (6.4%) and David Livingstone 7-8 (5.9%) had the greatest decline in stability.
- Table 13 (page 28) lists the 2021/2022 Secondary Stability figures in order of decreasing stability.
- Stability rates ranged from 56.6% (Virtual Secondary) to 100.0% (Sacré-Coeur 7-8, George V 7-8, and Ralph Brown 7-8).

SECTION C. THE WINNIPEG SCHOOL DIVISION 2016 CENSUS DATA

BACKGROUND

This section of the report summarizes some of the major variables in Statistics Canada's 2016 Census. The five tables and four maps present information for <u>all people</u> living in the Winnipeg School Division. The data is presented for each of the fifty-five elementary school neighbourhood catchment areas and the Winnipeg School Division for comparison. A new elementary catchment area called Waterford-Castlebury was created in the North-West corner of the Division in response to the new school planned for the area (see map, page 65). Census definitions for the data tables can be found at the end of this section (pages 43 to 44). Table 14 provides the global non-response rate (GNR) for each of the fifty-five English elementary school catchments. The GNR is an important measure of census data quality; a smaller GNR indicates a lower risk of non-response bias and therefore a lower risk of inaccuracy. Information from school catchments with high global nonresponse rates should be taken with caution because of the higher risk of inaccuracy.

	Global Non- Response		Global Non- Response
School Catchment	Rate	School Catchment	Rate

DISCUSSION OF DATA

<u>Table 15</u>

Table 15 (pages 34 to 35) contains information on families, income, unemployment, and education levels. The first column provides the non-institutional population size of the catchment area based on the 2016 Census. There are two measures of the percentage of lone parents in the area in the 2016 Census. The first is the percentage of all census families that are lone parent families, and the second is the percentage of those census families with children living at home that are lone parent families. A census family is defined as any married couple or couple living common-law (with or without children of either or both partners), or a lone parent of any marrial status with at least one child living in the same dwelling. A couple may be of opposite or same sex. Children include grandchildren living in the same household as their grandparents with no parents present. The percent of census families with children that are lone parent families ranged from 10.2% to 61.8%.

There are two measures of family income in the area in the 2016 Census. The first is the median income, in 2015, of all economic families. An economic family refers to a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage, commonlaw or adoption. A couple may be of opposite or same sex. The second measure is the median income, in 2015, of census families with one or more children under 18 years. The Prevalence of Low Income After-Tax is the percentage of the population living in private households below the low-income cut-offs after taxes. The cut-offs were selected on the basis that families with incomes below these limits usually spend 20% more of their income than average on food, shelter, and clothing, and hence can be considered to be living in straitened circumstances. **Incidence of low income ranged from 2.2% to 51.8%.** The unemployment rate is the percentage of the labour force that was unemployed the week before census day. The unemployment rate used in Table 15 is that of persons 15 years and over in the labour force according to the 2016 Census. The labour force includes persons 15 years of age or over who were either employed, actively looking for work, or were expecting to start work in four weeks. **The unemployment rate ranged from 1.9% to 20.9%.**

The column labelled "< Grade 12 Education" is the percentage of the population 25 to 64 years old that has a level of schooling less than grade 12. This is followed by the percentage of the population 25 to 64 years that has a university education. Figure 8 shows that the catchment areas with the highest percent of people with less than a grade 12 education are concentrated primarily in the Inner City. Conversely, catchment areas with a higher percentage of people with university education are concentrated primarily in the South. The percentage of the population between 25 and 64 years with less than grade 12 education ranges from 1.5% to 46.2% and the percentage with a university education ranges from 12.5% to 71.3%.

The Division has more lone parents and lower income families, higher prevalence of low income, higher unemployment, and more people with less than grade 12 education than the City as a whole.

<u>Table 16</u>

 Table 16 (page 37) contains information on visible minorities, ethnicity, Indigenous people and immigrants. The first column again provides the population size of the area.

The second column in the table indicates the percentage of the population who identified themselves as being a member of a visible minority. Visible minorities are defined as "persons, other than Indigenous people, who are non-Caucasian in race or non-white in colour". In 2016, 34.0% of people in the Division were visible minorities while visible minorities made up between 4.9% and 90.3% of the people living in catchment areas across the Division. Figure 9 (page 38) shows the relative numbers of visible minorities, Indigenous people, and other people across the Division. Catchment areas with the highest percent of Indigenous people are concentrated primarily in Inner City catchment areas while catchment areas with the highest percent of visible minorities are concentrated in the Inner City, North and Central areas.

The next three columns indicate, in descending order, the three most frequent ethnic origins - this includes single and multiple responses. Filipino, English, and Canadian were the three most frequent ethnic origins in the Division. If two or more ethnic origins have equal numbers, all are listed (e.g., Scottish/German).

The number of people who reported identifying with at least one Indigenous group (North American Indian, Métis, or Inuit) is listed next. There were two measures of the number of Indigenous people in the 2016 Census. One was based on the ethnic origin question and one was based on the Indigenous identity question. This table uses the second measure. This provides a count of the number of people who reported identifying with at least one Indigenous group, and/or those who

reported being a Treaty Indian or a Registered Indian, and/or who were members of an Indian Band or First Nation. In 2016, 17.3% of Division residents considered themselves Indigenous, with percents ranging from 2.7% to 57.6% for school catchment areas.

The last column indicates the percentage of the population that are, or had been at one time, landed immigrants in Canada. A landed immigrant is a person who is not a Canadian citizen by birth, but who has been granted the right to live in Canada permanently. In the Division, 30.0% of the population is or had been a landed immigrant with values ranging from 10.4% to 72.9% for school catchment areas.

In summary, the Winnipeg School Division has a higher percentage of visible minorities, Indigenous people, and immigrants than does the City of Winnipeg.

Table 17

Table 17 (page 39) provides information on home languages and mother tongue languages from the 2016 Census. Home language is the language spoken most often on a regular basis at home by the individual at the time of the census. Mother tongue refers to the language first learned at home in childhood and still understood at the time of the census. A person could have a single home or mother tongue language or multiple home or mother tongue languages. The 'Other Languages' category (defined as a grouping of all non-official languages collected by the census that are not displayed separately) was not included in the language columns. If two or more languages have equal numbers in a school neighbourhood catchment area, all are listed (e.g., Portuguese/Somali/Spanish).

The first column in the table indicates what percentage of the people had a home language that was not English. Overall, in the Division, this was 16.0% and it varied from 1.9% to 38.5% across the Division. A listing of the three most frequent single response home languages (other than English) follows. Only languages that accounted for at least 1% of the total catchment population were included in the top three home languages for the area. Tagalog and Punjabi were the most frequently cited home languages in the Division, other than English. All other languages in the Division accounted for less than 1% of the total Division population and therefore were excluded.

The next three columns in the table are a listing of the three most frequent single response mother tongue languages (other than English). **The last column is the percentage of people whose mother tongue language was not English. In the Division as a whole, this was 30.8% and it varied from 9.5% to 60.8% across the Division.** Tagalog, French and Punjabi were the three most frequently reported mother tongues other than English in the Division.

Compared to the City of Winnipeg, a higher percent of people living in the Winnipeg School Division reported a home language and mother tongue other than English.

<u> Table 18</u>

Table 18 (page 42) documents the change in population in each area from 2011 to 2016. This is followed by two columns that show what percentage of people changed residences in the year prior to the census and in the five years before the census.

The Division's population increased 3.1% from 2011 to 2016, while the City's population increased 6.6%. Individual school areas had a range of population changes – some areas increased by as much as 18.2% while others declined by as much as 5.5% (**Figure 10**, **page 40**).

There was considerable movement of people in the Division – 18.2% moved in 2015/2016 and 47.0% had moved within the five years before the census. Values for the City as a whole were less than this (14.1% and 40.4% respectively). The one-year movement data for the Division is shown in **Figure 11 (page 41)**.

*Source: Statistics Canada 2011 Census and 2016 Census (100% data); Mobility - 2016 Census (25% sample data)

*Note: The Meadows West catchment was split into two catchments after the 2011 Census resulting in a smaller catchment and smaller population count for 2016. By grouping data for both catchments (Meadows West and the newly created Waterford-Castlebury catchment) the results indicate a 24.6% increase in population.

Table 14 (pages 29 to 30)

<u>Global Non-Response Rate</u>. The global non-response rate is used as an indicator of data quality. It combined household non-response and item non-responses, and is weighted. A smaller global non-response rate indicates a lower risk of non-response bias and therefore a lower risk of inaccuracy.

Table 15 (pages 34 to 35)

<u>Census Family</u>. A census family is defined as a married couple and the children, if any, of either or both spouses; a couple living common law and the children, if any, of either or both partners; or, a lone parent of any marital status with at least one child living in the same dwelling and that child or those children. All members of a particular census family live in the same dwelling. A couple may be of opposite or same sex. Children may be children by birth, marriage or adoption regardless of their age or marital status as long as they live in the dwelling and do not have their own spouse or child living in the dwelling. Grandchildren living with their grandparent(s) but with no parents present also constitute a census family.

<u>Economic Family.</u> An economic family refers to a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage, common-law or adoption. A couple may be of opposite or same sex. Foster children are included.

<u>Prevalence of Low Income</u>. The Prevalence of Low Income is the percentage of households below the low-income cut-offs after taxes in 2015. The cut-offs were selected on the basis that families with incomes below these limits usually spend 20 percent more than average of their income on food, shelter and clothing (taking into account size of community of residence and family size), and hence can be considered to be living in straitened circumstances.

<u>Unemployment Rate.</u> The unemployment rate is the percentage of the labour force that was unemployed the week before census day. The labour force includes persons 15 years of age or over who were either employed, actively looking for work, or were expecting to start work in four weeks.

<u>Highest level of schooling.</u> 'Less than Grade 12 Education' is the percentage of the population 25 years to 64 years that has a level of schooling less than grade 12, and 'university education' is the percentage of the population 25 to 64 years that has a university education.

Table 16 (page 37)

<u>Visible minorities.</u> Visible minorities are defined as "persons, other than Indigenous people, who are non-Caucasian in race or non-white in colour".

Indigenous. There were two measures of the number of Indigenous people. One was based on the ethnic origin question and one was based on the Indigenous identity question. Table 16 uses the second measure. This provides a count of the number of people who reported identifying with at least one Indigenous group, that is, First Nations (North American Indian), Métis or Inuk (Inuit), and/or those who reported being a Treaty Indian or a Registered Indian, and/or who were members of an Indian Band or First Nation.

Landed immigrant. A landed immigrant is a person who is not a Canadian citizen by birth, but who has been granted the right to live in Canada permanently.

Ethnic origins. Ethnic origin refers to the ethnic or cultural origins of the person's ancestors.

Table 17 (page 39)

<u>Home language.</u> Home language is the language spoken most often or on a regular basis at home by the individual at the time of the census. A person could have a single home language or multiple home languages. The 'Other Languages' category (defined as a grouping of all nonofficial languages collected by the census that are not displayed separately) was not included in the language columns in Table 17.

<u>Mother tongue.</u> Mother tongue refers to the language first learned at home in childhood and still understood at the time the data was collected. A person could have a single mother tongue language or multiple mother tongue languages. The 'Other Languages' category (defined as a grouping of all non-official languages collected by the census that are not displayed separately) was not included in the language columns in Table 17.

SECTION D. 2018 FAMILY INCOME

BACKGROUND

The data reported in this section is based on Income Tax Returns of those families that live in the Division and have children younger than 18 years of age. Data for each of the 55 English program elementary school catchment areas were obtained from Statistics Canada. This year, after-tax income was used in the report. The after-tax income is total income minus provincial and federal income taxes.

Two key measures of income were obtained. The first is the Median Family Income. The median is the middle number of a group of numbers. Where a median income, for example, is given as \$48,000, it means that exactly half of the incomes reported are greater than or equal to \$48,000, and that the other half are less than or equal to the median amount.

The other measure is the percentage of families with children that are living below the lowincome cut-off (LICO). The cut-offs are set where families spend 20 percentage points or more of their income than the Canadian average on food, shelter and clothing (taking into account size of community of residence and family size), and hence can be considered to be living in straitened circumstances.

Because students do not necessarily attend their neighborhood school, it was necessary to calculate a weighted measure of income for schools. The weighting is based on the addresses of all students attending a particular school. This results in two additional variables "Weighted Median Income" and "Weighted % Below LICO" for all schools.

Secondary schools, the French Immersion Milieu schools, and elementary schools with broad catchment areas only have values in the derived weighted columns because the unweighted data are only obtained for the 55 non-overlapping English program elementary catchment areas.

DISCUSSION OF DATA

The 2018 Family Income data have been summarized on the following pages (**table 19**). There were 25,890 families with children residing in the Division in 2018 and the Division-wide median

family income for these families was \$59,940. Median family income values (weighted) ranged from \$29,397 (Niji Mahkwa) to \$115,262 (Robert H. Smith).

Just over twenty-five percent of families with children residing in the Division in 2018 were living below the low-income cut-off. In fourteen individual school catchment areas, 40% or more of the families were living below the weighted LICO, and at the other extreme, another twenty-nine school catchment areas had a weighted LICO rate less than 20%.

Notes:

1. Weighting is based on addresses of students in all grades in 2021/2022.

2. Calculation based on unique nature of school.

3. The results are based on after-tax income.

4. Includes 560 families not assigned to a school catchment area.

SECTION E. INNER CITY CRITERIA 2021/2022

The accompanying tables contain the result of the Principal Component Factor Analysis of the Inner City Criteria for all schools in the Winnipeg School Division. This analysis identifies schools with the highest needs. Nine input variables **(Table 20)** were used and two output factors were identified – the Socio-Economic Factor and the Language and Immigration Factor. Ranking of schools is based on the Principal Component Score for each factor. Schools with the highest socio-economic needs **(Table 21, pages 50 to 51)** or the most non-English speaking students or most immigrants **(Table 22, pages 52 to 53)** appear at the top of their respective tables. In this section of the report, each school appears only once, and includes data for all grades.

TABLE 20. VARIABLES INCLUDED IN THE ANALYSIS

SECTION F. REPORT ON INACTIVE STUDENTS IN GRADES 7 TO 12 - 2016/17 TO 2021/22

BACKGROUND

Student withdrawal data is of interest to a great many people. However, determining when a student has withdrawn from school is not always an easy task. In this report, an inactive student is defined as a student who left a Division school between October 1 and May 31 inclusive, and for whom there is no record of re-entry into any Division school in the current year. At this time, it is not possible to confirm whether a student has enrolled in a school at another Division and therefore these students are included in the overall inactive student count. All students in grades 7 or higher are included in this analysis (grades 7 to grade 12, JU and SU). Students 18 years old or higher are excluded since by law they are not required to attend school in Manitoba. To put the count of these inactive secondary students in perspective, the total number of students who have been at each school sometime between October 1 and May 31 is calculated. This is referred to as the 'Total Registration'.

The purpose of reporting the inactive student data is to get baseline data of student withdrawals from school. While some inactive students are students who have withdrawn from or 'dropped out' of school, others will be students who have registered in another division or who may have been impacted by the pandemic. For this reason, the numbers and percentages of inactive students reported should not be viewed as an accurate record of student withdrawals. The information provides some insight into the relative magnitude of student withdrawals over the years reported and provides a means of comparison between schools and across the years.

DISCUSSION OF DATA

The Total Division Registration in grades 7 and up showed a decrease from 11,676 in 2020/2021 to 11,655 in 2021/2022. The number of inactive students decreased from 534 in 2020/2021 to 503 in 2021/2022 (Figure 12).

The **number of inactive secondary students** has varied over the past 6 years from a low of 460 in 2016/2017 to a high of 564 in 2017/2018. Division wide, the **percentage of inactive secondary students** in 2021/2022 decreased (0.3%) from the previous year 2020/2021 (Figure 13). In 2021/2022, inactive secondary students represented 4.3% of total secondary registrations.

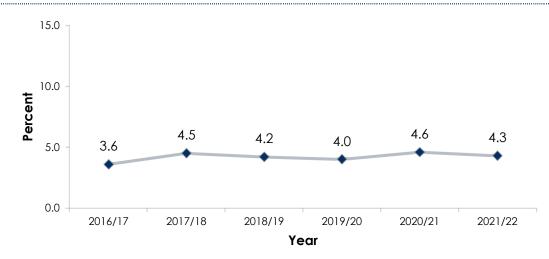

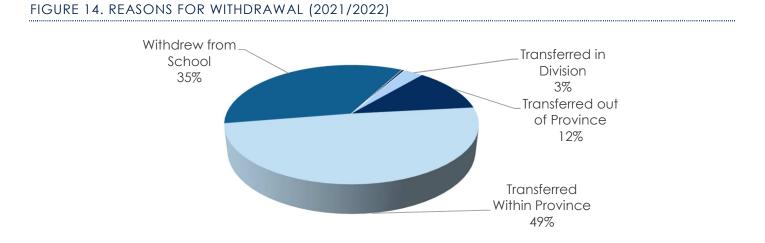

FIGURE 13. PERCENT OF INACTIVE SECONDARY STUDENTS (2016/2017 TO 2021/2022)

Figure 14 provides the exit code details for students who withdrew from school in 2021/2022. Fortynine percent of students transferred within Province and another 12% out of Province. At this time, it is not possible to confirm whether these students enrolled at another school and therefore are included in the overall inactive student count. In the absence of clear provincial definition and criteria for inactive students, the Division has applied a broader approach to inactive students and has included all these students. Students marked as 'Transferred in the Division' (n=15) are those who never re-enrolled in another school within the Winnipeg School Division after indicating they would. The last category, 'Withdrew from School' (n=178, 35%), includes students who left for a variety of reasons including: not attending school (103), withdrawn for other reasons (19), could not be located (18), withdrawn by parent/guardians (12), and left for personal/family reasons (4).

The **Parent/Guardian** code is used for students under the age of 18 who are withdrawn from school by their parents/guardians with no confirmation as to whether the student is attending another school.

The percentage of students who became inactive at individual schools ranged from **0%** to **29.0%** in **2021/2022**. There are 35 schools with students in Grades 7-12. Figure 15 below shows the number of schools that have less than 10% inactive students, 10-19% inactive students, and over 19% inactive students. Thirty-two schools had less than 10% inactive students, up by four since the previous year. At the other end of the scale, there was one school with more than 19% inactive students, down one from the previous year. Table 23 (page 58) shows the percentage of inactive students for each secondary school in 2021/2022.

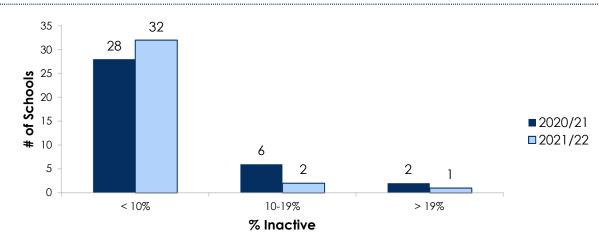

FIGURE 15. INACTIVE STUDENTS BY SCHOOL - FREQUENCY DISTRIBUTION (2020/2021 AND 2021/2022)

CONCLUSION

This report provides insight into the number of student withdrawals from school. Since it is not possible to confirm whether a student has enrolled in a school at another Division, these students are included in the overall inactive counts. Until a clear provincial definition is provided for inactive students, the Division will continue to apply a broader approach by including these students in the inactive count. The ability to link students to provincial and federal education administrative systems would strengthen the Division's capacity to locate students, mobilize supports and/or re-engage students in learning as appropriate. It would be helpful if the Department of Education could support then follow-up on students who have indicated they are moving or enrolling in schools in other divisions, provinces and/or federal systems as the information is not available to schools.

At the Division level, schools will continue to connect students and/or their families with school-based and/or division-based supports, as well as community agencies, to strengthen engagement and attendance. The Division will continue to enhance partnerships with other government departments and community agencies to support students and families.

SECTION G. INDIGENOUS FAMILY DATA - 2016 CENSUS

INDIGENOUS POPULATION

The City of Winnipeg (Census Metropolitan Area) had 92,810 Indigenous people at the time of Statistics Canada's 2016 Census. Of these, 36,745 (40%) lived in the Winnipeg School Division Catchment area (**see Fig. 16**). Looking at the Indigenous population as a percent of total population, 12.2% of Winnipeg's population was Indigenous compared to 17.3% of the Winnipeg School Division's population (**See Section C, Table 16, page 37**).

FIGURE 16. WINNIPEG INDIGENOUS POPULATION - 2016 CENSUS

INDIGENOUS FAMILIES

Table 24 (pages 62 to 63) shows the number of Indigenous families with children under 18 living in Manitoba, the City of Winnipeg, and the Winnipeg School Division elementary catchment areas in 2016. The first two columns are the number of all families in each area broken down by Indigenous families and non-Indigenous families. The third column gives the total families (Indigenous and non-Indigenous) for each area. The last five columns contain data on families with children less than 18 years of age. The first of these two columns give the number of Indigenous families in each area and the Indigenous median family income for each area. The next two columns give the number of non-Indigenous families living in each area and the non-Indigenous median family income for each

area. The last column gives the total number of families (both Indigenous and Non-Indigenous) with children under 18 living in each area.

In 2016, the City of Winnipeg had 15,835 Indigenous families with children less than 18 years old and 5,960 (38%) of them lived in the Winnipeg School Division catchment area. These 5,960 families represented 24.5% of all families with children under 18 living in the Division.

The median family income for Indigenous families with children under 18 living in the Division was \$37,244, over \$20,000 less than the median family income for comparable families (Indigenous with children under 18) living in the City as a whole (\$57,755), and over \$32,000 less than the median family income for non-Indigenous families with children under 18 living in the Division (\$69,381) (see Fig. 17). Family income for Indigenous families with children under 18 ranged from \$17,998 (Gladstone) to \$111,970 (Brock Corydon). Indigenous family income was not reported in school catchments where there was a small number of Indigenous families.

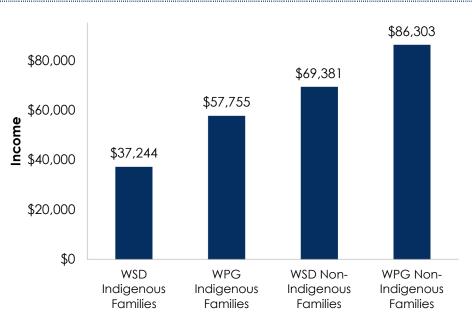

FIGURE 17. MEDIAN FAMILY INCOME - 2016 CENSUS*

*Note: Only includes families with children under 18 living at home.

Table 25 (pages 64 to 65) shows the estimated percent of Indigenous families with children under eighteen by Winnipeg School Division school in 2016. As not all families attend their local school and Census data was not obtained for secondary schools and schools with special catchment boundaries, the estimated value for each school was obtained by using enrolment weights for the year in question. Niji Mahkwa and Children of the Earth percentages were set to 100%.

The average estimated percent of Indigenous families with children for the Division in 2016 was 24.5%. The estimated percent of Indigenous families with children for Division schools ranged from 8.7% (Rockwood) to 100% (Niji Mahkwa and Children of the Earth). Among schools that are not designated Indigenous only schools, David Livingstone had the highest percent (61.6%) of estimated Indigenous families with children.
